Circular No 16

31.12.2025

To All Members/Units

Dear comrades and colleagues,

NEW YEAR GREETINGS TO THE SBI FAMILY

On the joyous occasion of the New Year, AISBIEA extends its warm and fraternal greetings to the entire workforce of the State Bank of India, award staff, officers, subordinate staff, along with the leadership and families who stand firmly behind them. We wish you all a prosperous, healthy, and purposeful New Year.

The remarkable journey of SBI over the last 70 years as a customer-centric institution and a trusted partner of the nation's economy is inseparably linked to the dedication, commitment, and sacrifice of its employees. Today, SBI proudly serves **520 million customers** through a robust digital and physical presence spanning every corner of the country, supported by a vast network of over **23,000 branches** and the tireless efforts of **231,841 employees** deployed across this system. These achievements are not mere numbers; they represent the collective strength, resilience, and public spirit of the SBI workforce.

In the previous financial year, SBI once again demonstrated its unmatched relevance as the backbone of the Indian banking system. By contributing over **40% to the record ₹1.78 lakh crore profits of public sector banks**, SBI reaffirmed its leadership role while continuing to serve more than 52 crore citizens. The Bank's global recognition being awarded **World's Best Consumer Bank 2025** and **Best Bank in India 2025** and its entry into the prestigious **USD 100-billion market capitalisation club** clearly reflect growing public confidence in public sector banking and the professionalism of its workforce.

The phenomenal success of the YONO platform with over 90 million users, and the sanction of more than 2.25 lakh digital MSME loans, highlights SBI's ability to blend technological leadership with inclusive growth. These initiatives have strengthened small businesses, supported employment generation, and advanced the cause of financial inclusion—further reinforcing SBI's unique nation-building role.

While celebrating these collective accomplishments, AISBIEA firmly believes that sustainable growth and future performance depend on the well-being of employees. Increasing workloads, staff shortages, extended working hours, and continuous performance pressures have placed enormous strain on employees and their families.

Ensuring a healthy **work–life balance**, humane working conditions, and adequate staffing is not a concession, but a necessity for maintaining efficiency, integrity, and long-term institutional strength. As SBI continues to shoulder greater national responsibilities, it is imperative that human resources are nurtured, protected, and respected. A motivated, healthy, and balanced workforce alone can carry forward SBI’s proud legacy and fulfil its future nation-building mandate.

AISBIEA reaffirms its unwavering commitment to protect the rights, dignity, and welfare of SBI employees, while constructively engaging with the management to ensure people-centric policies and sustainable growth. At the same time, the prevailing policy environment in relation to banking, the economy, and labour is a matter of serious concern, as it increasingly reflects an approach that prioritises profits over people. The continuing dilution of state control in the name of ‘ease of doing business’, primarily to facilitate private and foreign capital, has become the core thrust of these policies and is being accelerated across sectors. Such a direction, if left unchecked, poses grave risks not only to public sector banking and employment security, but also to the broader economic and social interests of the nation.

With unity, determination, and solidarity, let us move forward together to strengthen our Bank and serve the nation with renewed confidence in the coming year.

With fraternal greetings,

Yours comradely,

V Anilkumar
GENERAL SECRETARY
